

PARIRAKSHA PALLIATIVECARE

Abstract:

Palliative care plays a crucial role in enhancing the quality of life for patients facing serious illnesses, especially when financial constraints prevent them from accessing essential medications. "PARIRAKSHA" is a web application aimed at automating the operational functions of "Pariraksha Palliative Society". It provides free medicines to patients who are suffering from life-threatening illness. This streamlines the management of patient data, staff data, medication inventory, management of visitors, medicine distribution and attendance. Making it easier for both staffs and administrators to focus on the core mission of delivering compassionate palliative care. It empowers palliative care providers to reach a wider audience of patients in need and ensure the efficient delivery of essential medications. With its user-friendly interface and notification system.

USERS:

1. CONTROLLER
2. DOCTOR
3. VOLUNTEERS
4. STAFF
5. VISITORS

USERS FUNCTIONS:

Controller:

1]Login

2]Attendance Management

Mark attendance
View personal attendance
View doctor attendance
View staff attendance
View volunteer attendance

3]Doctor Management

Add doctor
Delete doctor
Update doctor details
View doctors

4]Staff Management

Add staff
Update staff
Delete staff
View staff

5]Volunteer Management

Approve volunteer request
Add volunteer
Delete volunteer
View volunteer

6]Visitor Management

Approve visitor request
View visitor feedback
View visitors

7]Medicine Management

View medicine stock
Indicate expired medicine and least stock medicine
View medicine distribution history

8]Patient Management

View patients
Search Patient

Doctor:

1]Login

2]Attendance Management

View personal attendance

3]Patient Management

Add Patient
Delete Patients
Update patients details
View patients
Search Patient

4]Medicine Management

Add medicine stock
Update medicine stock
Delete medicine
Search medicine
View medicine stock
View medicine distribution history
Indicate of expired medicine and least stock medicine

5]Volunteer Management

View volunteer

6]Visitor Management

View visitor feedback
View visitors

7]Staff Management

View staff

Volunteer:

1] Login

2]Attendance Management

View personal attendance

3]Doctor Management

View doctors

4]Volunteer Management

View volunteer

5]Medicine Management

View medicine stock
Indicate expired medicine and least stock medicine
View medicine distribution history

6]Patient Management

View patients
Search Patient

Distribute medicine

Visitor:

Request for visit
Upload feedback

Laboratory Staff:

1]Login

2]Attendance Management

View personal attendance

3]Patient Management

Add patient(test)

Edit patient(test)

view patient(test)

Delete patient(test)

4]Result Management

Upload test results

Message the result

MODULES:

1] Login

2] Attendance Management

Mark attendance
Update attendance
View attendance

3] Visitor Management

Submit request
Submit feedback
Approve request
View visitors
View feedback

4] Doctor Management

Add doctor
View doctor
Update doctor
Delete doctor

5] Patient Management

Add patient
View patient
Update patient
Delete patient
Add patient medicine

6] Laboratory Staff Management

Add staff
View staff
Update staff
Delete staff

7] Volunteer Management

Add volunteer
View Volunteer

Update volunteer
Delete volunteer
Volunteer request
Approve volunteer request

8] Medicine Management

Add medicine
View medicine stock
Update medicine
Delete medicine
Indicate expired and least medicine

9] Distribute Medicine

View medicine
Distribute medicine
Distribute medicine history

10] Laboratory Patient Management

Add lab patient
View lab patient
Update lab patient
Delete lab patient

11] Laboratory Result Management

Upload test report
Message test report

Laboratory

Software Requirements:

Frontend: React

Backend: Node.js

Database: Mongo DB

Software Used: VS Code

Existing System:

The existing manual system for managing the palliative care records at Pariraksha poses several challenges.

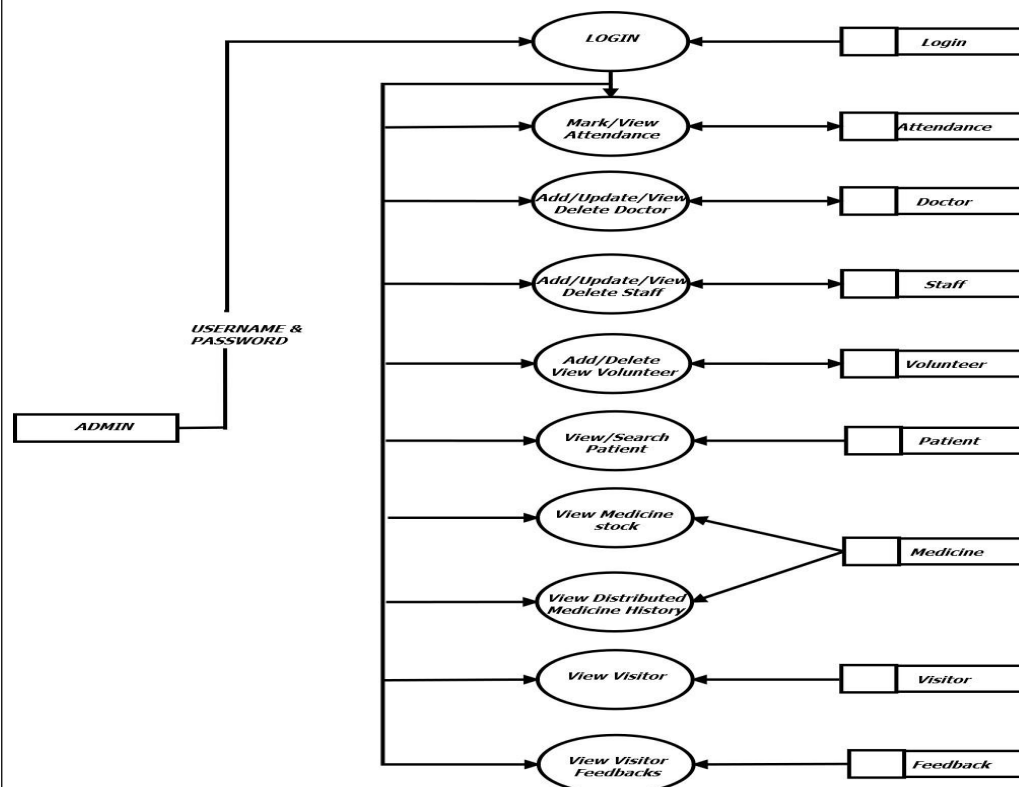

Manual Data Entry The current system relies on manual data entry, which is time-consuming and prone to errors. Transcribing patient information, medication details, and other relevant data by hand increases the likelihood of inaccuracies.
